# Oracle® Data Integrator Adapter for Hyperion® Essbase Readme

**Version**: 10.1.3.5.5 | **Date**: December 2009

## Contents

## What is Oracle® Data Integrator Adapter for Oracle® Hyperion® Essbase?

The **Oracle® Data Integrator Adapter for Hyperion® Essbase** enables you to perform the following tasks using Oracle Data Integrator:

- Load metadata and data into Oracle's Hyperion® Essbase applications
- Extract metadata and data from Oracle's Hyperion® Essbase applications
- Calculate data in Oracle's Hyperion® Essbase applications
- Execute pre/post MaxL scripts during Load and Extract to Oracle's Hyperion® Essbase applications

**Review this information thoroughly before installing the knowledge adapter.**

## What is New in Oracle® Data Integrator Adapter for Hyperion® Essbase?

The IKM SQL to Hyperion Essbase (Data) knowledge module has been updated to allow for multiple parallel data loads. IKM options have been added to the IKM SQL to Hyperion Essbase (Data) knowledge module to enable multiple data loads in parallel on an ASO enabled database. Multiple data load buffers can be used on an aggregate storage database at the same time. For example 3 separate ODI interfaces can load to 3 separate data load buffers. The load buffers will be grouped within ODI, using the IKM option GROUP_ID, and committed when the final load is finished.

# Installation and Upgrade

Please refer the readme included with this patch release for more information on installing and upgrading Oracle Data Integrator.

## Prerequisites

- Oracle Data Integrator 10.1.3.5 or later must be installed.

## Supported Operating Systems

This release of Oracle Data Integrator Adapter for Hyperion® Essbase supports these operating systems:

### 32-bit Support

- AIX 5.2, ML7 through 5.3.x (With implicit support of L extensions)
- Solaris (SPARC) 9
- Solaris (SPARC) 10
- Redhat Linux 4.0
- Microsoft Windows 2001 Server, SP4
- Microsoft Windows 2003 Server, SP1

### 64-bit Support

- AIX 5.2, ML7 through 5.3.x (With implicit support of L extensions)
- HP_UX11i (Itanium) 11.23 through 11.3x
- Solaris (SPARC) 9
- Solaris (SPARC) 10
- Microsoft Windows 2003 Server, SP1

## Compatible Software

This release of Oracle® Data Integrator Adapter for Hyperion® Essbase 10.1.3.5.5 is compatible with these releases of Oracle Data Integrator and Hyperion Essbase:

- Oracle Data Integrator 10.1.3.5.5 and later
- Essbase 9.x and later
- Essbase 7.1.6 (Data Load & Data/Metadata Extract Only)

## Installing Oracle® Data Integrator Adapter for Hyperion® Essbase

The updates to the Oracle® Data Integrator Adapter for Hyperion® Essbase 10.1.3.5.5 are included in the Oracle Data Integrator 10.1.3.5.5 patch release. Please refer the readme included with this patch release for more information on installing and upgrading Oracle Data Integrator.

## Issues and Workarounds

In the Operator, on the Execution tab, the statistics on Insert, Update, Delete, and Errors are shown as zero for all Hyperion Essbase loads and extracts. To see the correct statistics on success and failed rows:

1. Expand the session that loads data into the Hyperion Essbase application data or extracts data from the application.
2. Open **Report Statistics**.
3. Click the **Execution** tab. A stack trace is displayed that shows the statistics.

## More Information

Please refer to the documentation installed with the product.
